Cumulative editorial index

Including January 1977 through December 1977. Number preceding hyphen is month of issue; those following are page numbers. Asterisks indicate items appearing in departments. PRODUCTION ENGINEERING is indexed in Applied Science & Technology and the Engineering Index, available in libraries generally. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, Mich., 48106. Reprints of early issues are available from Johnson Reprint Corp., 111 Fifth Ave., New York, N. Y. 10003.

Actuators, fluid—basics and update, 7-40
Air film equipment, materials handling, 12-62
Assembly, Netherlands research, 6-56
Assembly, parts orientation, 6-56
Assembly machines, modular bases for, 9-88
Automated testing systems, 3-62
Automatic storage/retrieval, 12-54

Backart, L., Looking for a handling breakthrough? Concept competition will uncover the best supplier, 12-74
Brooks, J., Overhead cranes—Vertically mobile manipulators, 12-60
Bar code readers, shopfloor data entry, 10-74
Barnich, R. G., Sprechen Sie FORTRAN?, 4-87
Batch assembly, using gravity to orient parts, 6-56
Batch manufacturing, 3-5*
Bearings, rolling-element—basics and update, 11-56
Betz, G. M., You think OSHA is wrong? Then fight!, 5-59
Boulden, L. L.,
Drives that learn and remember, 4-82
Fluid actuators—PRODUCTION ENGINEERING Report, 7-40
How they're making frl's better, 10-60
Organizing for quality, 3-24
Braun, Jr., E. C., Which consultant? 10 tough questions provide the answer, 3-28
Broaching, modern high-speed, 7-47

Calculators, small, 7-10*
Capacity expansion, no-cost, 2-20
Capital expense decisions, 1-56
Chapman, D., It makes parts—but can it make happy operators?, 9-36
Chemical machining, 8-8*
Circuit protection, 11-74
Clark, S. C., Punching into the middle ground of production, 2-52
Cleaning machined parts, 3-55
CNC, embraces microprocessors, 4-73
CNC, punching for medium-volume production, 2-52
CNC, remote computerized diagnosis of machines, 5-74
Coating equipment, modular, 9-92
Coatings, UV-curable, 7-50
Coding, data-capture devices for, 10-64
Coding, in-plant, 6-60
Colorants for plastics, 11-65
Communications, an aid to production, 1-61
Computer,
diagnosis of CNC machines, 5-74
language—FORTRAN, 4-87
networks for distributed control, 5-78
tapes, magnetic field effects upon, 4-22*
vision systems, 11-4*
Consensus standards, 2-14*
Consultants, material handling systems, 3-28
Controllers, automated test system, 3-62
Controllers, ladder diagram, 2-19*
Conveyors,
basics and update, 10-50
belt, 10-53
flat-top chain, 10-58
metal belt, 10-54
overhead, 12-58
roller, 10-51, 12-70
slat, 10-57
tow, 10-56
trolley, 10-55
wheel, 10-52
Cranes, overhead, 12-60
Culbertson, J. E., Avoiding errors in shopfloor data entry, 10-64
Cutting oil reclamation, 6-54

Deburring, dry blast, 10-12*
Digital probe, 11-18*
Driverless vehicles, 12-56
Drives,
DC with programmable control, 4-82
eddy-current, 4-84
hydraulic, 4-84
with microprocessor brains, 4-82
Dust control systems, 2-56

Eddy current noncontact measurements, 11-76
EDM, thin copper wire-electrode, 3-58
Electromagnetic clutches and brakes, 6-50
Energy, panorama, 2-12*
Engineering,
overtime—compulsory, unpaid, 6-26
salaries, 1977 review, 8-19
societies—under fire, 7-24
Engineering societies,
IEEE election, 10-6*
reader appraisal of, 11-28
usefulness to members, 7-24
Engineers,
dislike bonus barriers, 2-29
federal tax advice for, 3-13*
guide—getting most out of group meetings, 8-14*
guide—surviving management meetings, 5-22
guide—writing product support publications, 10-24
interest in job-affecting public issues, 5-28
job enrichment for, 4-32
opinions of engineering societies, 11-28
overtime survey results, 9-29
professional development, 9-8*
salary review for 1977, 8-19
training programs for, 1-66
vote for modularity, 9-78
Erickson, P. R., Improved washing of machined parts, 3-54
Etching, electron-beam, 10-10*

Fasteners, threaded—basics and update, 8-40
Fastening equipment, modular, 9-84
Filter-regulator-lubricator units, new development in, 10-60
Fluid actuators, basics and update, 7-40
Forming, modular machines for, 9-78
Frus, J. R., Waveform sensing closes the loop in step motor control, 2-47

Government, interference on Standards, 2-14*
Government, see OSHA

Haas, P. R., Modular machines for a flexible future, 9-68
